PROFESSIONAL EXPERIENCE

iCustomer.ai

Remote

Software Engineer Intern

06/2025 - Present

- Designing and prototyping scalable graph data solutions using Snowflake, BigQuery, and various graph databases.
- Developing Python pipelines leveraging LLMs for automated data modeling and entity extraction
- Exploring machine learning approaches to improve data quality and relationship scoring in graph models
- Building ETL workflows with dbt and Python to integrate complex business logic into data models

BSS(Brain Stimulation and Simulation) Lab @ NorthEastern University/UMass Boston

Boston, MA

Research Assistant

06/2025-Present

- Building a DL model to automate skull segmentation in MRI scans, aiming to improve accuracy over existing methods
- Researching U-Net architectures, partial volume estimation, and brain/CSF presegmentation to inform model design
- Developing prototypes in Python using PyTorch and TensorFlow; handling MRI data preprocessing and augmentation

School on Wheels, Schoolhouse, Infinity Squad

Newton, MA + Remote

Math Tutor

2020-2024

- Tutored elementary, middle, and high school students in numerous levels of mathematics
- Explained complex concepts in simple terms, improving student grades and confidence
- Customized learning plans for private tutoring

EDUCATION

Cornell University: GPA 3.87

Ithaca, NY

BS, Computer Science

08/2024 - 05/2028

Relevant Courses: CS 2110: OOP and Data Structures (A), MATH 2210: Linear Algebra (A), INFO 1998: Trends in Web Dev (Pass, 95%), CS 3410: Computer Organization and Programming(A-), CS 3780: Introduction to ML(A), CS 2800: Discrete Structures(A-)

TECHNICAL SKILLS

Programming Languages: Java, Python, C, Swift, JavaScript, TypeScript, SQL

Frontend: HTML, CSS, React

Backend: Node.js, Express.js, Firebase

Machine Learning: TensorFlow, PyTorch, OpenCV, Keras

PROJECTS

Personal Website

(ReactJs, HTML, CSS, Js, Jsx)

Created a personal website to showcase projects and personal interests

Web Novel Scraper

(Python)

Wrote a Python script to scrape and aggregate 1000+ web novel chapters into a single text file by leveraging consistent URL and HTML patterns; built to streamline quotation lookup for a university writing assignment

Recipe Sharing Web App

(React, CSS, Typescript, NodeJs, ExpressJs, Firebase)

Developed a web app for users to manage personal recipes with features to create, save, edit, and delete entries; integrated an AI-powered tool that generates customized recipe variations based on user-specified dietary or ingredient restrictions

Skull Segmentation Model (Building)

Python, Tensorflow, NumPy

Creating a machine learning model to segment the skull from MRI images
